

# Richmond Food Asset Map

## Purpose

Vancouver Coastal Health (VCH) is interested in making a food asset map - a simple to use information hub comprised of community partners sharing community kitchen and food programs available to the local population.

## Process

Collect data on food assets via internet and email

Organise data into excel spreadsheet

Add components to Richmond Food Asset Map (RFAM)

Obtain feedback on RFAM from interviewing 2 community partners

## Demographics of Richmond

38.5% of population earning household income of less than \$40 000 (VCH, 2017)

25% of children living in poverty (VCH, 2017)

## Results

-17 kitchen and food programs located in Richmond  
-2 interviews conducted with VCH staff for feedback on map

## Feedback on map

Map was straightforward and easy to navigate

Useful for dietitians to refer food assets to clients

## Project Goal

To identify food assets and collect feedback on map from partners

## Future development

Promote map on social media

Include transit information

Update map at least once a year

## Take home message

Community members believe the food asset map is a very useful tool but agree that more promotion is needed.
