

Vancouver Food Asset Map

Help People With Food Insecurity

WHAT IS THE ISSUE?

Food insecurity affects

1 in 9 household in BC (VCH, 2017)

The highest rate of food insecurity

34.2 %

faced by single moms (VCH, 2017)

Food insecurity arises when people lack access to food either financially or physically.

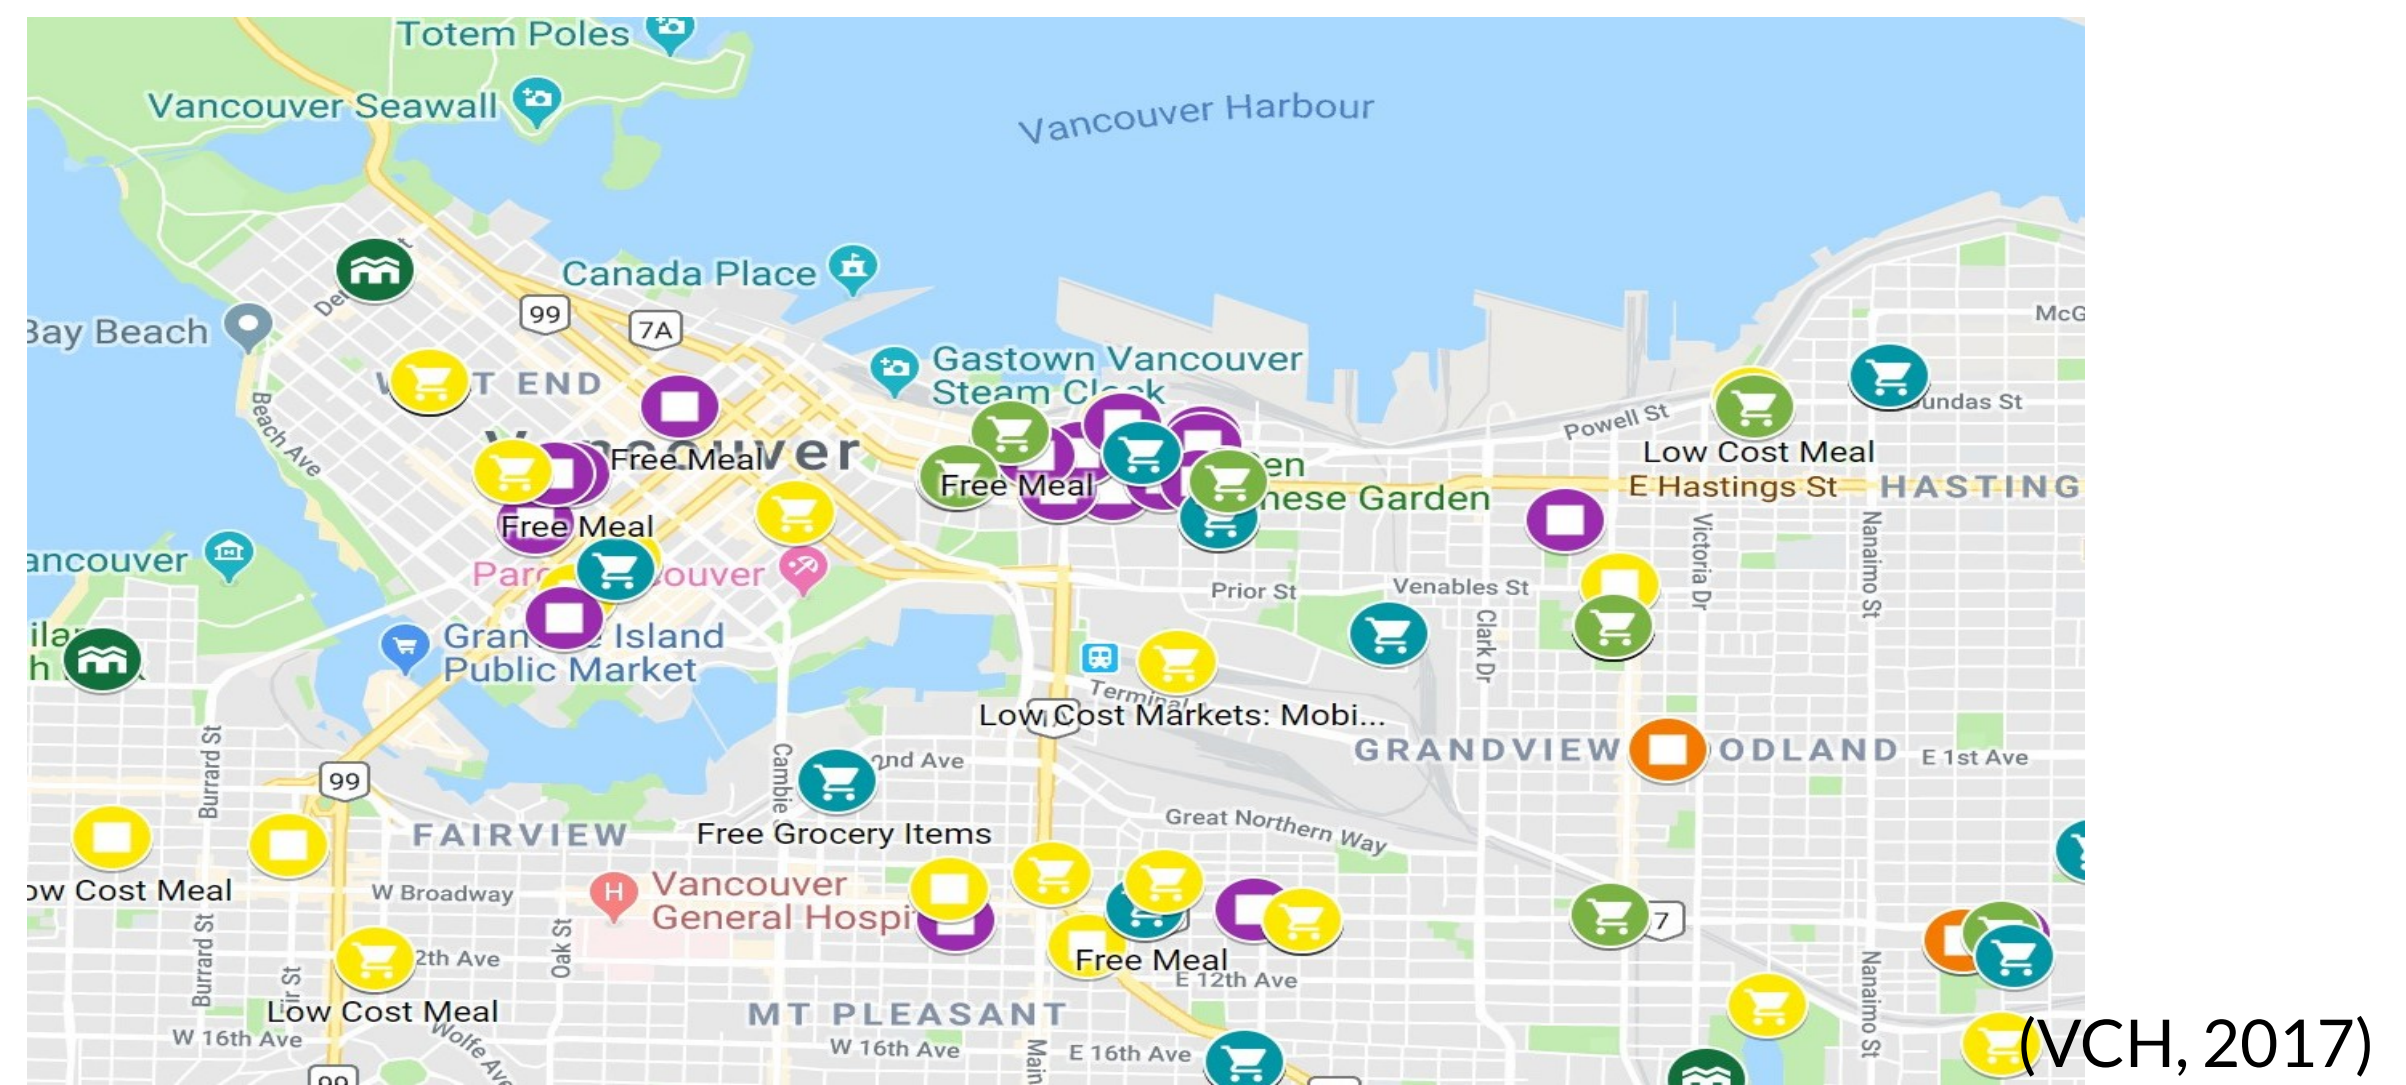

WHO CAN HELP?

Vancouver Coastal Health

Provides health care services that support people from birth to end of life. (VCH, 2017)

Vancouver Food Asset Map

Highlights food assets located in local communities. (VCH, 2017)

OUR GOALS

1. Make sure the information of service providers are **up-to-date**
2. **Educate** the food insecure community about how to use the map
3. Find out how to **improve** the food map

WHAT WE FOUND

Providers' Response

- updated (54.90%)
- non-updated (45.10%)

- 51 service providers were contacted
- 28 updated their information.
- 17 new service providers were added to the map

- A total of **3** participants attended the workshop.
- They indicated that the workshop was **informative**

More detailed categorizations between low cost and free food service providers.

OUR APPROACH

Meeting with VCH Food map project coordinator

Conducting workshop to instruct community members

Contacting service providers for new data update

Collecting feedbacks from participants after workshop

TAKE HOME MESSAGES

Distributive justice

Improvements need to be done to ensure everyone finds the map helpful regardless of their race, gender, education background...

Procedural justice

Decisions on the improvement of the food asset map should include a diverse population from the community
